DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because applicant has not defined JIS-Z-8729. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Suga et al (JP 2003-248218).
3. Suga discloses a transparent substrate, a light diffusing layer provided at least one one surface of the transparent substrate either directly or through another layer, the light diffusing layer comprising an ionizing radiation curing resin and an ultraviolet light absorber and having, on its surface, fine irregularities that have a function of diffusing light (abstract, claims 1,7,14,16).

Allowable Subject Matter

4. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 7-13 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not disclose the features in combination as claimed in 7 and 13, nor the elements as claimed in 2-6 in combination with the features of claim 1.
